CONTENTS

VOLUME 49 NUMBER 1 (published 8 December 1988) JANUARY 1989

Notice

I SI units, conversion factors and abbreviations (revised)

Articles

O. Hinojosa, T. J. Jacks, T. A. Calamari and D. P. Thibodeaux — 1 Electron spin resonance study of the relationship of UV irradiation to nitroxide radical formation in desferrioxamine (Desferal) and related hydroxamate and hydroxylamine derivatives

D. Le Nouën, J. Marko, G. Vermeersch, N. Febvay-Garot, A. Lablache-Combier, M. Perree-Fauvet and A. Gaudemer — 7 Photo-CIDNP evidence for charge-transfer interaction between synthetic water-soluble porphyrins and guanine

I. I. Creaser, A. Hammershøi, A. Launikonis, A. W.-H. Mau, A. M. Sargeson and W. H. F. Sasse — 19 Photoproduction of hydrogen from linked chromophores: anthracene and cobalt cage complexes—II

Anson S. W. Li and Colin F. Chignell — 25 Spectroscopic studies of cutaneous photosensitizing agents—XIII. pH Dependence of the photochemistry of photoallergens bithionol and fentichlor: an electron spin resonance study of the free radical photoproducts

Arthur M. Halpern, Christian Falck and Michael W. Legenza — 33 The photophysical properties of some C_{15} lupine alkaloids: sparteine, lupanine, thermospine, and α-diplospartyrine

M. Kuwabara, T. Yamamoto, O. Inanami and F. Sato — 37 Mechanism of photosensitization by pheophorbide *a* studied by photohemolysis of erythrocytes and electron spin resonance spectroscopy

Helen H. Evans, Ronald M. Rerko, Jaroslav Mencl, Marian E. Clay, Antonio R. Antunez and Nancy L. Oleinick — 43 Cytotoxic and mutagenic effects of the photodynamic action of chloroaluminum phthalocyanine and visible light in L5178Y cells

Gerald J. Smith, Kenneth P. Ghiggino, Louise E. Bennett and Tracy L. Nero — 49 The 'Q-band' absorption spectra of hematoporphyrin monomer and aggregate in aqueous solution

Daniel B. Yarosh and Joseph Ceccoli — 53 Comparison of phage T4 *denV* endonuclease V and *M. luteus* UV-DNA endonuclease by serology and DNA hybridization

Graham E. Kelly, William D. Meikle and Douglas E. Moore — 59 Enhancement of UV-induced skin carcinogenesis by azathioprine: role of photochemical sensitisation

M. L. Pantelides, J. V. Moore and N. J. Blacklock — 67 A comparison of serum kinetics and tissue distribution of Photofrin II following intravenous and intraperitoneal injection in the mouse

Ida F. Orengo, Homer S. Black, Anne H. Kettler and John E. Wolf, Jr. — 71 Influence of dietary menhaden oil upon carcinogenesis and various cutaneous responses to ultraviolet radiation

A. R. Steinhardt, T. Popescu and L. Fukshansky — 79 Is the dichroic photoreceptor for *Phycomyces* phototropism located at the plasma membrane or at the tonoplast?

A. H. (Jay) Burr, David K. Eggleton, Robert Patterson and Johanna T. Leutscher-Hazelhoff — 89 The role of hemoglobin in the phototaxis of the nematode *Mermis nigrescens*

G. Renger, M. Völker, H. J. Eckert, R. Fromme, S. Hohm-Veit and P. Gräber — 97 On the mechanism of photosystem II deterioration by UV-B irradiation

Shouyu Rong, Richard K. Brown and Gordon Tollin — 107 Kinetics of chlorophyll photosensitized electron transfer reactions in phospholipid bilayer vesicles: electrostatic effects of surface charge and valinomycin addition

VOLUME 49 NUMBER 2 (published 19 December 1988) FEBRUARY 1989

Articles

Timothy M. Dietz and Tad H. Koch — 121 Photochemical reduction of 5-bromouracil by cysteine derivatives and coupling of 5-bromouracil to cystine derivatives

Jürgen Franke, Ulrich Ott, Horst E. A. Kramer and Rainer H. Traber — 131 Mechanistic studies of the photoreaction of flavin with N,N-dimethylpropargylamine

Kenneth Rousslang, Lynn Allen and J. B. Alexander Ross 137 Phosphorescence maxima and triplet state lifetimes of NAD^+ and ϵ-NAD^+ in ternary complexes with horse liver alcohol dehydrogenase

Wilhelm J. M. van der Putten and John M. Kelly 145 Laser flash spectroscopy of methylene blue with nucleic acids. Effects of ionic strength and pH

James P. Thomas and Albert W. Girotti 153 Reactivity of photochemically-generated lipid hydroperoxides in cell membranes with glutathione peroxidase

David Kessel and Kevin Smith 157 Photosensitization with derivatives of chlorophyll

L. S. Matchette, R. W. Waynant, D. D. Royston, V. M. Hitchins and R. K. Elespuru 161 Induction of lambda prophage near the site of focused UV laser radiation

Catharine M. L. West and James V. Moore 169 The photodynamic effects of Photofrin II, hematoporphyrin derivative, hematoporphyrin, and tetrasodium-meso-tetra(4-sulfonatophenyl)porphine *in vitro*: clonogenic cell survival and drug uptake studies

Morris R. Lattimore, Jr. 175 Effect of ultraviolet radiation on the energy metabolism of the corneal epithelium of the rabbit

Hideki Kandori, Sinzi Matuoka, Yoshinori Shichida and Tôru Yoshizawa 181 Dependency of photon density on primary process of cattle rhodopsin

Michael J. Doughty and Anthony P. Cullen 185 Long-term effects of a single dose of ultraviolet-B on albino rabbit cornea—I. *In vivo* analyses

Daisuke Okada, Toshiki Nakai and Atsushi Ikai 197 Transducin activation by molecular species of rhodopsin other than metarhodopsin II

Wolfgang G. Heil, Dieter Dörnemann and Horst Senger 205 Effect of light quality on the *in vitro* thylakoid protein phosphorylation in the green alga *Scenedesmus obliquus*

R. M. D. Verhaert, T. J. Schaafsma, C. Laane, R. Hilhorst and C. Veeger 209 Optimization of the photo-enzymatic reduction of the carbon–carbon double bond of α–β unsaturated carboxylates in reversed micelles

Hans Gyllenhammar 217 Mechanisms for luminol-augmented chemiluminescence from neutrophils induced by leukotriene B_4 and N-formyl-methionyl-leucyl-phenylalanine

Research Note
Nella Lerš, Erika Salaj-Šmic and Željko Trgovčević 225 Overproduction of SSB protein enhances the capacity for photorepair in *Escherichia coli recA* cells

Review Article
Ralf Oelmüller 229 Photooxidative destruction of chloroplasts and its effect on nuclear gene expression and extraplastidic enzyme levels

VOLUME 49 NUMBER 3 (published 8 March 1989) MARCH 1989

Guest Editorial
Harry Morrison i Expansion of *Photochemistry and Photobiology*: a two year experiment

Rapid Communication
James P. Thomas and Albert W. Girotti 241 Glucose administration augments *in vivo* uptake and phototoxicity of the tumor-localizing fraction of hematoporphyrin derivative

Articles
Garry R. Buettner, Robert D. Hall, Colin F. Chignell and Ann G. Motten 249 The stepwise biphotonic photoionization of chlorpromazine as seen by laser flash photolysis

Antonio E. Alegria, C. Murali Krishna, Rosalie K. Elespuru and Peter Riesz 257 An ESR study of the visible light photochemistry of gilvocarcin V

Anthony A. Shaw and Martin D. Shetlar 267 Ring-opening photoreactions of cytosine and 5-methylcytosine with aliphatic alcohols

C. C. Leznoff, S. Vigh, P. I. Svirskaya, S. Greenberg, D. M. Drew, E. Ben-Hur and I. Rosenthal 279 Synthesis and photocytotoxicity of some new substituted phthalocyanines

Diana L. Walstad, J. Tony Brown and Stephen K. Powers	285	The effect of a chalcogenapyrylium dye with and without photolysis on mitochondrial function in normal and tumor cells
Thomas A. Ciulla, John R. Van Camp, Evan Rosenfeld and Irene E. Kochevar	293	Photosensitization of single-strand breaks in pBR322 DNA by rose bengal
Barbara W. Henderson and Victor H. Fingar	299	Oxygen limitation of direct tumor cell kill during photodynamic treatment of a murine tumor model
C. J. Tralau, A. R. Young, N. P. J. Walker, D. I. Vernon, A. J. MacRobert, S. B. Brown and S. G. Bown	305	Mouse skin photosensitivity with dihaematoporphyrin ether (DHE) and aluminium sulphonated phthalocyanine (AlSPc): a comparative study
Simona Badilescu, Ricardo Bicca de Alencastro, Hoa Le-Thanh, Guy Richer, Camille Sandorfy, Pierre-Paul Vaudreuil and Daniel Vocelle	313	The protonation of a retinyl Schiff base: a study by FTIR spectroscopy at low temperature in solution
In-Soo Kim, Uma Bai and Pill-Soon Song	319	A purified 124-kDa oat phytochrome does not possess a protein kinase activity
Vitaly A. Sineshchekov and Alexei V. Sineshchekov	325	Fluorescence of phytochrome in the cells of dark-grown plants and its connection with the phototransformations of the pigment
Gary Gardner	331	A stereochemical model for the active site of Photosystem II herbicides
Hidenori Hayashi, Takumi Noguchi and Mitsuo Tasumi	337	Studies on the interrelationship among the intensity of a Raman marker band of carotenoids, polyene chain structure, and efficiency of the energy transfer from carotenoids to bacteriochlorophyll in photosynthetic bacteria
Velu Senthilathipan and Gordon Tollin	345	Spinach ferredoxin reduction by membrane-bound chlorophyll triplet state *via* a diquat mediator
Ana Campa, Marta Salim-Hanna and Giuseppe Cilento	349	α-Oxidase activity in plants as promotor of electronic energy
Osamu Shimomura	355	Chemiluminescence of panal (a sesquiterpene) isolated from the luminous fungus *Panellus stipticus*
P. F. Heelis, G. O. Phillips, F. Lenci and G. Colombetti	361	Flavins in liposomes—anomalous photochemical effects at high pigment concentrations
Research Notes		
Patricia E. Gallagher, Randi B. Weiss, Thomas P. Brent and Nahum J. Duker	363	Wavelength dependence of DNA incision by a human ultraviolet endonuclease
David A. Bellnier and T. J. Dougherty	369	The time course of cutaneous porphyrin photosensitization in the murine ear
Book Review	373	

VOLUME 49 NUMBER 4 (published 20 March 1989) APRIL 1989

Articles		
C. E. Pfluger and R. L. Ostrander	375	The direct observation of a psoralen–thymine UVA induced solid-state cycloaddition reaction product by single-crystal x-ray diffractometry
D. H. Tallmadge, J. S. Huebner and R. F. Borkman	381	Acrylamide quenching of tryptophan photochemistry and photophysics
L. P. A. van Houte, R. van Grondelle, J. Retèl, J. G. Westra, D. Zinger, J. C. Sutherland, S. K. Kim and N. E. Geacintov	387	Excited state properties of the N-(deoxyguanosin-8-yl)-2-aminofluorene adducts
Hari Mohan, P. N. Moorthy and R. M. Iyer	395	Optical absorption and emission studies on laser dye incorporated in Nafion membrane

Michael J. Schifano and Leonard I. Grossweiner	401	Photosensitization tissue model
Rex M. Tyrrell and Mireille Pidoux	407	Singlet oxygen involvement in the inactivation of cultured human fibroblasts by UVA (334 nm, 365 nm) and near-visible (405 nm) radiations
Ronald E. Rasmussen, Marie Hammer-Wilson and Michael W. Berns	413	Mutation and sister chromatid exchange induction in Chinese hamster ovary (CHO) cells by pulsed excimer laser radiation at 193 nm and 308 nm and continuous UV radiation at 254 nm
Jun-ichiro Komura, Hiroshi Mitani and Akihiro Shima	419	More efficient excision repair of pyrimidine dimers in the specific DNA sequence than in the genome overall in goldfish cells
Debra L. Hanson and Vincent A. DeLeo	423	Long wave ultraviolet radiation stimulates arachidonic acid release and cyclooxygenase activity in mammalian cells in culture
W. Gregory Roberts, Kevin M. Smith, Jerry L. McCullough and Michael W. Berns	431	Skin photosensitivity and photodestruction of several potential photodynamic sensitizers
J. M. Bruce, A. A. Gorman, I. Hamblett, C. W. Kerr, C. Lambert and S. P. McNeeney	439	Anthralin-derived transients—I. The triplet state and the products of its reaction with oxygen in benzene
David Kessel	447	Determinants of photosensitization by mono-L-aspartyl chlorin e6
David H. Lynch, Sandra Haddad, Vernon J. King, Mark J. Ott, Richard C. Straight and Christopher J. Jolles	453	Systemic immunosuppression induced by photodynamic therapy (PDT) is adoptively transferred by macrophages
Vivienne E. Reeve, Gavin E. Greenoak, Paul J. Canfield, Christa Boehm-Wilcox and Clifford H. Gallagher	459	Topical urocanic acid enhances UV-induced tumour yield and malignancy in the hairless mouse
Junko Murakami, Masaharu Okazaki and Takeshi Shiga	465	Near UV-induced free radicals in ocular lens, studied by ESR and spin trapping
Grigorii Ya. Fraikin, Marina G. Strakhovskaya, Emma V. Ivanova and Andrew B. Rubin	475	Near-UV activation of enzymatic conversion of 5-hydroxytryptophan to serotonin
Alan M. Jones and Harold P. Erickson	479	Domain structure of phytochrome from *Avena sativa* visualized by electron microscopy
Paul Galland, Luis M. Corrochano and Edward D. Lipson	485	Subliminal light control of dark adaptation kinetics in *Phycomyces* phototropism
Paul Galland, Margarita Orejas and Edward D. Lipson	493	Light-controlled adaptation kinetics in *Phycomyces*: evidence for a novel yellow-light absorbing pigment
Yasushi Koyama, Tomoko Nakano, Hiroaki Utsumi and Shoichi Yamamoto	501	Adenylate kinase bound to the chromatophore membranes of *Rhodobactor spheroides* G1C
Milton J. Cormier, Douglas C. Prasher, Mat Longiaru and Richard O. McCann	509	The enzymology and molecular biology of the Ca^{2+}-activated photoprotein, aequorin
Naohisa Wada, Rikuo Shibata, Masayuki Shibazaki and Nobutaka Suzuki	513	x-Ray photoelectron valence band studies on firefly D-(−)-luciferin
Research Note		
R. E. Mahnken, M. Bina, R. M. Deibel, K. Luebke and H. Morrison	519	Photochemically induced binding of $Rh(phen)_2\ Cl_2^+$ to DNA
Technical Note		
Toshio Mori, Altaf A. Wani, Steven M. D'Ambrosio, Chia-Cheng Chang and James E. Trosko	523	*In situ* pyrimidine dimer determination by laser cytometry

VOLUME 49 NUMBER 5 (published 27 April 1989) MAY 1989
